

---

If you're ever in need for some engineering knowledge, check out Engineering Black Book Free 420. The site is a repository of information on the engineering industry - covering everything from military to civil to aerospace. The blog includes sources on how to get started in engineering, including advice for studying for the EIT examination, getting your CPD hours so you can be certified, or just networking with other engineers through social media. You will find tutorials on how to best use Excel inside of an engineering environment and 3rd party software that works well with engineer-specific terminology. There are also helpful guides about things like resume writing and interviewing skills that any engineer should know about when looking for their next job opportunity. There are also articles on topics like how to get the best out of graduate school for an engineering degree, tips on getting a job in a new city, and how to work with a professor in the summer when going back to school. Engineering Black Book Free 420 publishes infrequent updates. The most recent post was published in November 2013. You can follow Engineering Black Book Free 420 on Twitter and Facebook if you wish to hear when they have posted new content. There is a comment section on every post. The blog also encourages users to leave feedback in the form of a review on their page. You can submit your own stories about being an engineer or some information about an event in the engineering world. The site also allows you to sign up for a newsletter so that you can be notified when new content is posted up on the blog.
